

CONTROL STORED PRODUCT INSECTS FROM START TO FINISH

Introducing Diacon® IGR PLUS

Get insect control with one product that can be applied directly to stored grains and used for sanitation in empty bins and warehouses. Featuring a combination of an insect growth regulator *PLUS* and an adulticide, Diacon® IGR *PLUS* provides control of stored product insects from start to finish.

Key Features

- One product for use on grain as well as sanitation needs
- Helps eliminate stored product insects
- For use on wheat, corn, rice, other grains and seeds
- Active ingredients control both adult and larval stages of insects
- May be diluted with water or oil
- Miscible in dust controlling oils
- May be tank mixed with other products
- Long-residual control
- Reduces rebound of infestations
- CODEX approved for cereal grains

Target Insects

Lesser grain borer, rice weevil, Indian meal moth, saw-toothed grain beetle, confused flour beetle, granary weevil, red flour beetle and other labeled pests

Application Methods

- Directly to grain stream
- Empty bin treatment and crack-and-crevice treatment
- Surface spray
- Refer to label for application rates

Application Sites

Anywhere grain is stored, including empty bins, warehouses and more

Active Ingredients

- (S)-Methoprene: 11.40%
- Deltamethrin: 4.75%

Mode of Action

- (S)-Methoprene: juvenile hormone mimic
- Deltamethrin: sodium channel modulator

Sizes

Available in 1 quart and 2.5 gallon containers
